

TGCP and Partnership with Pangea Fund

- The Pangea Fund is an investment vehicle set-up to deploy capital into promising Indie AA-Game projects. Beyond sourcing projects via our vast network, the Pangea Fund will have first-look access at all titles through it's sister business, the Pangea Cup-a global competition to find the next big video game.
- The Fund is structured to invest in projects in exchange for a revenue share agreement (not equity in the game studio). This structure allows investors to enjoy a shorter duration and less risk. Each investment is expected to return the principal within ~2 years and return 2-4x within 4 years. Investors are paid in dividends as each game becomes successful thus avoiding the typical 7 year period to liquidity associated with typical venture capital funds.
- The Pangea Fund terms are developer-friendly and the Fund is committed to a fair and ethical approach to partnering with game developers. When they win, we all win.
- ❖ Target fund size is \$50M, with 20 up to 40 Investments ranging from \$500K-5M

TGCP and Partnership with Pangea CUP

- * The video game industry is booming. There are currently over 50K indie games but only a small number become financially successful. Picking hits in video games is akin to trying to pick hits of theatrical releases. But what if there was a way to find, assess and predict which games would be successful. And what if you could invest in these projects during development?
- ❖ Pangea CUP is the first Indie video game global competition, providing passionate developers an exclusive opportunity to win a \$1 million prize to produce the world's next big video game.
- ❖ Millions of game developers will submit their unreleased games to enter THE PANGEA CUP. 100 finalists will join the competition.
- * An All-Star team of mentors and judges from the gaming universe will select the world's next hit games, with live events at iconic locations.
